

Quality policy

This document expresses the commitment of STERCH-INTERNATIONAL s.r.o. to quality, precision, and technological innovation in the delivery of high-precision components and functional products for the aerospace, space, scientific, and energy industries. Our activities are based on systematic management, adherence to delivery schedules, compliance with applicable requirements, process efficiency, and continuous improvement of the quality management system. The consistent promotion of innovative solutions and a focus on cutting-edge technologies make us a trusted partner for international corporations.

The company management demonstrates its leadership through the following approaches:

S	Systematic approach is a fundamental principle of managing a successfully operating company.
T	Timeliness is one of the key indicators of a reliable partner.
E	Efficiency of production processes is an essential parameter of prosperity.
R	Responsibility for employee development and continuous learning distinguishes us from the competition.
C	Commitment and promotion of our own solutions is a key trait for success.
H	High technology is the path to becoming a recognized partner of international corporations.

The fifth edition of the Quality Policy, valid from 26 January 2026, was approved by:
